DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3, 5-10 and 12-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest an image processing apparatus or method of controlling an image processing apparatus comprising a recording means, a display means, power supply means, judging means for judging a power supply capacity during a time when an image is confirmed in an image reproduction mode wherein the display means is turned off if a power supply capacity is below a first capacity and when the display means is turned off an indicating unit is turned on to indicate that a process is being performed and image data left to be stored is written. While power management systems for imaging systems (e.g. Anderson, US 5,963,255) and systems for warning a user when a battery capacity falls below a threshold level are known in the art, the claimed system and method of turning on an indicating unit to indicate that a process is being performed when an image display device is turned off as claimed is not taught or suggested.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
